

7. Using Git-Hub Desktop Perform the following tasks

- Clone repository from the path - <https://github.com/KalyanM45/Spam-EmailDetection.git>
- Demonstrate that branch creation is disallowed for this repository
- Fork this AI project repository
- Create a feature branch (GIT-EXAM) to implement changes
- Change/Add your code in the branch
- Submit a pull request for review
- During the review process, resolve any merge conflicts and incorporate feedback to ensure smooth integration and collaboration

✅ **Step a: Clone Repository (GitHub Desktop)**

1. Open **GitHub Desktop**
2. Click **File → Clone Repository → URL**
3. Paste: <https://github.com/KalyanM45/Spam-EmailDetection.git>
4. Choose **EMPTY folder**, Click **Clone**

✅ **Step b: Show Branch Creation Not Allowed**

1. Click **Current Branch → New Branch**
2. Name: test-branch
3. Click **Create Branch**
4. Click **Push origin**

👉 ❌ Error will appear: Permission denied / cannot push

✓ This proves: You cannot create branch in original repo

✅ **Step c: Fork Repository**

1. Open repo in browser
2. Click **Fork** (top right)
3. Now repo appears in your account

✅ **Step d: Clone Your Fork**

1. GitHub Desktop → **File → Clone Repository**
2. Select your forked repo , Click **Clone**

✅ **Step e: Create Feature Branch (GIT-EXAM)**

1. Click **Current Branch**
2. Click **New Branch**
3. Name: GIT-EXAM
4. Click **Create Branch**

✅ **Step f: Add / Modify Code**

👉 Go to project folder → create file:

mycode.py

👉 Add simple code: `print("Spam Email Detection - My Contribution")`

✅ Step g: Commit & Push

1. Open GitHub Desktop
2. Add commit message:
Added my feature code
3. Click **Commit to GIT-EXAM**
4. Click **Push origin**

✅ Step h: Create Pull Request

1. Click **Create Pull Request** (in GitHub Desktop or browser)
2. Select:
 - Base → original repo (KalyanM45)
 - Compare → GIT-EXAM
3. Click **Create Pull Request**

✅ Step i: Resolve Merge Conflicts

👉 If conflict appears:

GitHub Desktop will show **conflict warning** ,Click **Open in editor** , Fix code (remove):

```
<<<<<<< HEAD
=====
>>>>>>>
```

Save file

Then: Commit changes and Push again
