

6 . Using Git-bash Desktop Perform the following tasks a. Clone repository from the path - <https://github.com/KalyanM45/AI-ProjectGallery.git> b. Demonstrate that branch creation is disallowed for this repository c. Fork this AI project repository d. Create a feature branch (GIT-EXAM) to implement changes e. Change/Add your code in the branch f. Submit a pull request for review. g. During the review process, resolve any merge conflicts and incorporate feedback to ensure smooth integration and collaboration

Create Folder AI-Project-Gallery

✅ Step a: Clone Repository

1. Open GitHub Desktop
2. Click **File → Clone Repository**
3. Go to **URL tab** Paste:
`https://github.com/KalyanM45/AI-Project-Gallery.git`
5. Choose local path
6. Click **Clone**

✅ Step b: Demonstrate Branch Creation Not Allowed

1. Click **Current Branch → New Branch**
2. Name: test-branch
3. Click **Create Branch**
4. Click **Push origin**

👉 ❌ You will get error: “Permission denied” / “Cannot push”

✓ This proves: You cannot create/push branch in original repo

✅ Step c: Fork Repository

1. Open repo in browser
2. Click **Fork** (top right)
3. Now repo is created in your account

✅ Step d: Clone Your Fork

1. In GitHub Desktop → **File → Clone Repository**
2. Select your forked repo
3. Click **Clone**

✅ Step e: Create Feature Branch (GIT-EXAM)

1. Click **Current Branch**
2. Click **New Branch**
3. Name: GIT-EXAM

4. Click **Create Branch**

✅ **Step f: Add/Change Code**

1. Go to project folder
2. Create file: mycode.py

👉 Add: `print("My contribution to AI Project Gallery")`

✅ **Step g: Commit & Push**

1. Open GitHub Desktop
2. You will see changes
3. Add message:
Added my feature code
4. Click **Commit to GIT-EXAM**
5. Click **Push origin**

✅ **Step h: Create Pull Request**

1. In GitHub Desktop → Click **Create Pull Request** OR open in browser
2. Select:
 - Base → original repo (KalyanM45)
 - Compare → your GIT-EXAM branch
3. Click **Create Pull Request**

✅ **Step i: Resolve Merge Conflicts**

👉 If conflict appears:

GitHub Desktop will show **conflict warning** ,Click **Open in editor** , Fix code (remove):

```
<<<<<<< HEAD
=====
>>>>>>>
```

Save file

Then: Commit changes and Push again
